
PROTECTING ITS EMPLOYEES IS THE TOP CONCERN OF ADMINISTRATORS

Building: National Bank of
Kuwait (Lebanon)

Location: Lebanon

Film: SCLSRPS7

Type: Safety & Security

Installation Size: 300 M²

CASE STUDY

The Situation: Safety is an increasing concern for people around the world. In most cases, it is the top priority for building managers. That is why administrators at the National Bank of Kuwait (Lebanon) were seeking enhanced protection for their employees, clients, and their building structure in the event of glass breakage. Their head office occupies the first three floors of a large, predominantly glass, skyscraper.

The Solution: The local LLumar distributor recommended clear safety and security window film (7mil-175 microns) to be installed as a retrofit security enhancement. The scratch-resistant film was installed on the first three floors of the building's interior to protect the staff, clientele, and furnishings.

The Results: The administration and bank staff were satisfied with the professional installation and the quality of the film. They feel secure knowing they have the added protection of LLumar safety film on the glass surrounding them. Although the film is clear, it blocks up to 95% of the harmful UV rays which contribute to skin cancer and fading. That is why LLumar was chosen for a second branch location at Jounieh.

LLumar is a registered trademark of CPFilms, a Unit of Solutia. CPFilms is the world's leading manufacturer of window film and an ISO 9001:2000 registered company.
